

WARNING POISON!

RAT ERADICATION IN PROGRESS

An operation to eradicate rats introduced to Suvarrow is being implemented by the Te Ipukarea Society in partnership with the Cook Islands National Environment Service. From the **22nd of April 2013** rat bait containing Brodifacoum (25ppm) has been spread across Anchorage, Motu Kena and possibly other islets of Suvarrow Atoll.

FOR YOUR SAFETY:

- Stay off these islets and do not allow children access until further notice**
 - Do not touch the bait**
 - Do not collect or consume crabs from the baited islands or surrounding waters until further notice**
 - If Poisoning is suspected consult a physician**
 - Contact the Suvarrow caretakers for further advice and information**
-
